## DEVELOPMENTAL SCREENING QUESTIONNAIRE

All parents worry about their children and usually recognize when something is not quite right. Your child's development is one of the most enjoyable parts of parenting. Yet it can also be of concern. Currently, about 1 in 160 children are diagnosed with an Autism Disorder. Early identification is a key factor in helping children with these disorders.

The Center for Disease Control and the American Academy of Pediatrics now recommend **routine formal screening** for developmental problems at 18 and 24 months.

Mesa Pediatrics is committed to this and asks you to fill out this short form today. It will be scored by your physician or provider today. This information will be entered into your child's medical record for review today. If there are any concerns raised as you answer any of the questions, please bring them to our attention today.

This is a separate service from your visit today. In accordance with the American Academy of Pediatrics Guidelines, you or your insurance carrier will be billed a small fee for this service (**\$15.00**). At present, most insurance companies provide coverage for this, however some do not. If you have questions about this, please contact your insurer about coverage for Developmental Screening with CPT code 96110.

\*\* APIPA does not cover this screening. If you choose to have this screening, you will be agreeing to be responsible for payment.
